He says that Starter Caldwell, by a single downward stroke of his right arm on Saturday helped the bookmakers all over the country to pocket more than a million dollars. It was an unfortunate, unnecessary and blameworthy act. Not only were two colts, Ben Ali and Quito, left

at the post, but half a dozen others, Rupert included, got away so bad that they never were included in the race. A brute that was never backed by his owner, trainer or stable attendants, nor by the general pub-lic, was given a flashing start by a flagrant error of judgment, if nothing more, and the great Suburban race became a farce. Haggin stood to win \$50,000 with Ben Ali, and the public would have won \$300,000. Congressman Scott and his friends stood to win about \$70,000 on Quito, and race-goers perhaps \$200,000 on straight and place bets. There was no excuse whatever for dropping the flag. ### EXPOSING SPIRITUALISM.

Henry Seibert, of Philadelphia, left \$60-600 to maintain a chair in the University of Pennsylvania, en condition that a commission of scientists and scholars should be appointed to examine into so-called spiritual phenomena. The Commission was appointed. It was large, strong, impartial, and represented medicine, literature, matural sciences, moral philosophy, anatomical science, history, engineering, chemistry, natural philosophy, electrical science, etc. The Commission has labored for three years earnestly, taking all possible testimony and investigating all classes of "spiritual manifestations," here and in Europe, and under all possible conditions. Its report is now ready for the press, and must prove a highly instructive and profoundly interesting volume. So far as can be ascertained, it will give the verdict of the Commission against spiritualism. It pronounces that no medium can present tests that will undergo calm scientific investigation without exposure of fraud-albeit, the medium in some cases may be the victim of delusion and honestly believe herself to be the means of spirit communication.

cheered on its way by the discovery of a single novel fact." It found as a fact that almost any professional juggler can perform tricks more wonderful than the manifestations of the best mediums; that in one case a "modern magician" performed before the Commission, without detection, far more marvelous slate-writing tricks than the regular mediums, and then explained in detail how the cheat was effected. The report, it is understood, will fully expose the cabinet tricks, the materialization frauds, the showing of spirit hands, etc.

But that it will "down" the mediums thinking people it will go a long way in bringing "spiritualism" into contempt, and columns of advertisements in the future, as in the past, of trance, writing, speaking and materializing mediums, whose regular "circle," "sittings" and "seances" will be duly announced from day to day.

### THE ENGLISH JUBILEE.

Something of the old time splendor and pageantry of royalty addresses the eye of the Londoner now, when Kings, Queens, Princes, Princesses, and Embassadors by the score ride as escort to Victoria, Empress and Queen. Westminster Abbey has been robbed of its glories temporarily, by a mask of bunting, and a lining of rough lumber supporting false galleries and seats for the aristocratic multitude that is to witness the jubilee commemorative ceremonies in that historic pile. All England will be ablaze for a week with decorations; the air resonant with martial strains, the songs of children and the shouts of the people. It will be a period of processions and cereand that is seeking to crush it. monials; of feasts and balls; of routs and merry-making; of solemn services and gorgeous pageants; of present-giving and gift-receiving; of the decoration of men

At Pasendena in Los Angeles county. there are miles of roadway prepared, miles of concrete walk laid over tracts where the city has not yet been settled. And upon every tract of land water has been piped. What is the result? The newcomers are flocking in, and finding all things ready, occupy the tracts, paying enough to return all the original out-go, and put a magnificent profit on top of it. So it is all through the south section-it was the preparation of the way, the laying out of tracts, the improvement of roads, planting of shade trees, and introduction of water, that made the spots such strong attractions to the stranger. Wherever introduced as from California, the first inquiry made of him was, "From California. Ah, indeed! What address?" "Sacramento." "Sacramento, eh? How far is that from Los Angeles or Pasadena?" With only rare exceptions, he reports, did he meet people who had any intelligent idea of Central and Northern California, and yet his business took him among peodle of intelligence, and supposed to be of broad information. What we need to do for our share of duty in making the future of this "great empire of the West" eclipse its past, and to "make available" the inexhaustible resources of the central and on the Sacramento river, or on any of the northern section, is to dress the land in its best, prepare the table for guests, and send out the invitation. It was so good a stand and made such a wonderful growth, that everybody saw that t paid. Then he watered his growing alfalfa, and it paid him more. Now he has been moving his pump around and giving some of his neighbors a benefit, so that

there is not a man with an eye half open who does not see the immense profit in the thing. Canal irrigation is the the thing. Canal irrigation is the cheapest that can be had, but pump irrigation is cheap enough. It requires 326,700 gallons to cover an acre one foot deep. Now, if we can get land enough into a contract we will agree to deliver 350,000 gallons by pump on the top of the bank at any given point on the Sacramento river for \$1 25. This would cover an acre a foot deep and allow 23,300 gallons for waste. If anybody don't think that that will pay, even for wheat, let him go down on the island and see wheat on land flooded, along side of wheat on the same kind of land not flooded. There is over thirty bushels to the acre difference. One will all be number one wheat, and most of the other number two, so that there will be about \$40 an acre difference in this crop. And this flooded land was not flooded this year, but last year. Flooding once in two years is a big thing for wheat. Now pump irrigation will pay

Or Black Leprosy, is a disease which is considered incurable, but it has yielded to the curative properties of SWIFT'S SPECIFIC—now known all over the world as S. S. Mrs. Balley, of West Somerville, Mass., near Boston. was attacked several years ago with this hideous black eruption, and was treated by the best medical talent, who could only say that the disease was a species of

And consequently incurable. It is impossible to describe her sufferings. Her body from the crown of her head to the soles of her feet was a mass of decay, masses of flesh rotting off and leaving great cavities. Her fingers festered and three or four nails dropped off one at a time. Her limbs contracted by the fearful ulceration, and for several years she did not leave her bed. Her weight was reduced from 125 to 60 pounds. Perhaps some faint idea of her condition can be gleaned from the fact that three pounds of Cosmoline or ointment were used per week in dressing her sores. Finally the physicians acknowledged their defeat by this Black Wolf, and commended the sufferer to her All-wise Creator. Her husband hearing wonderful reports of the use of Swift's Specific (S. S. S.), prevailed on her to try it as a leat received. Her husband hearing wonderful reports of the use of Swift's Specific (S. S.), prevailed on her to try it as a last resort. She began its use under protest, but soon found that her system was being relieved of the poison, as the sores assumed a red and healthy color, as though the blood was becoming pure and active. Mrs. Bailey continued the S. S. until last February; every sore was healed; she discarded chair and crutches, and was for the first time in twelve years a well woman. Her husband, Mr. C. A. Bailey, is in business at 17½ Blackstone street, Boston, and will take pleasure in giving the details of this wonderful cure. Send to us for Treatise on Blood and Skin Diseases; mailed free.

This looked like a put-up job for the latter to win, but a change of drivers gave the victory to the other.

The M-Street Improvement. The committee appointed by the Sacra-

mento City and County Improvement Association to consider the proposition for the construction of a miniature park through the center of M street, from Front to Tenth, planting therein palm and other trees, etc., called upon City Attorney Hart yesterday morning to obtain his official opinion on the subject. Mr. Hart rendered it to the effect that municipal corporations had no power except those that the statutes expressly confer on them, and such other powers that may arise by fair and necessary the city charter to give the City Trustees the power to use M street as proposed, and Section 2 of the Vrooman street law of 1885, which enumerates what the city may do in the way of improving the streets, lanes, etc., does not seem to specify the class of street improvement contemplated for Capitol

AN IRRIGATION SCHEME

TO TREBLE VALUES IN SACRA-MENTO COUNTY,

And Treble the Business and Prosperity of the City and County-A Definite Plan Suggested.

EDS. RECORD-UNION: There are 400 sections of land wanting water in Sacramento county, and water is running to waste that taxable value of the entire city and county combined; would treble the present agricultural revenue of the county; treble the population of the county; treble the numnumber of farm wagons in use; treble the number of ploughs, harrows, spades and

hoes, and every kind of improvement and utensil; treble the amount used of every kind of household article, from a clothespin to a bed-room set, from a nutmeg to a barrel of flour. All this means profit to every established business in this city. It means an increase in rents and a raise in the price of corner lots. It means growth to the city-rapid growth. It means profit

in speculation; it means the use of more money and at higher interest; in fact, it means a quickened impulse to every avenue of trade and business-from the team that hauls a load of sand to the engine that moves a car train of fruit. Now, shall it be brought about by water?

Twelfth and K. 23.0 above datum; at Thirteenth and K. 18.5 above datum; at Thirteenth and K. 18.5 above datum.

A resolution was passed of the Board's intention to have K street improved from Eleventh to Fourteenth street, by grading and graveling and the construction of curbings and gutters.

A resolution of intention of intent planted as would yield the largest returns per acre. With the crange and grape several hundred dollars revenue per acre could be made, with wheat and barley only \$25 to \$40 could be realized. It is plain The City Engineer was directed to take the necessary levels for establishing official grades in that portion of the city between Twenty-eighth and Thirty-first streets, attention was turned to farming, rewarded her farmers with wealth without water, beyond the natural rainfall. Farmers used their thousands of acres, and the small profit per acre made them wealthy. Sacramento county does not, and never has, stood among the highest as a grain county.

Thirtieth streets, as they desire that land in the construction of the proposed park. The matter was set for hearing before the Board on July 18th, and the Clerk was instructed to give notice of the intention of the Trustees to vacate the street and alley. whole county, it is unquestionably the best county for irrigation in the State, all things considered. Other places will produce good fruit, but there is no lottery in the business in Sacramento county. Some would-be settler will find the land too high to raise Texas steers upon, but there is not one acre of the upland of Sacramento county, at present selling prices, but will pay for itself in profit the fifth year effect if pay for itself in profit the fifth year after it is planted to choice fruit and well cultivated and properly irrigated.

Some one will say "we want railroads." Have we not got them, and have we not had them much longer than any other county? We have so many railroads now that there is scarcely room for more, under the present modes of cultivation.

Another will say, we want more settlers, so as to divide up these large land holdings; that will bring the boom. But it will do nothing of the kind! Water is the key to a boom. It has been and is the key to the whole success in Southern California, and it will be here. Get water, and this year, in addition to the examination Some of the races were closely contested, and much money changed hands.

The first race was a three-eighths dash. Minnie R. was the favorite, and won from Plack Oak in 0:36k.

Putting up the price of land and lots will not bring settlers. Land is as high as it not bring settlers. Land is as high as it not bring settlers. Land is as high as it not bring settlers. Land is as high as it not bring settlers. Land is as high as it not bring settlers. Land is as high as it not bring settlers. Land is as high as it not bring settlers.

We all know that the American and Cosumnes rivers have all the water that is necessary to irrigate all of the land in Sacthe hands of the committee funds enough to make an examination of the situation Let that committee lead in this matter. Let there be no clackers put on, but men who have faith in the "water;" men who can and will give their time. This whole ful as the settlement of Pasadena, in Lo

Angeles county.

One other thing I would suggest: let the real estate dealers put up for a few acres of land and plant it to orange trees plant a cypress hedge around it, and make a beginning of a little paradise. After they have cultivated it for one year, they will be able to sell it at an advance. If they wish to demonstrate to the Eastern people that the orange can be grown here, other than country, then men who have capital to invest will also have faith. For keeping the Stomach, Bowels, and Liver in good working order, I have never found any medicine equal to Ayer's Cathartic Pills. I always use this remedy when occasion requires.— Randolph Merse, Lynchburg, Va. About five years since, my son became

a cripple from Rheumatism. His joints and limbs were drawn out of shape by and limbs were drawn out of shape by
the excruciating pain, and his general
health was very much impaired. Medicines did not reach his case until he
commenced taking Ayer's Pills, three
boxes of which cured him. He is now
as free from the complaint as if he had
never had it, and his distorted limbs
have recovered their shape and pliancy.
